Program 5: List

Submit Assignment

Due Sunday by 11:59pm   **Points** 10   **Submitting** a file upload   **File Types** h
Available after Sep 22 at 12am

Like I did for vector, I have uploaded the (required) beginning to this assignment. And like vector, just finish it.

Please note though that the test file I've given does not have everything in it. And a template function that isn't called gets deleted. So you need to write a good test file. I'll only grade the list though.

Don't worry though, this is the last "write ADT from scratch" assignment. Dynamic nodes are super important so you get this homework. But after this you'll be debugging or optimizing instead of writing from scratch.
